

Agile Foundations

Date

18 – 19 September 2019

Venue

Hotel Van der Valk
Utrecht

Price

€995 (excl. VAT)

Course description

The two-day Agile Foundations course goes beyond a primer of Agile values, principles and practices. Through experiential learning, participants get hands-on with the application of Agile practices and are prepared to start leveraging new skills on the job.

Duration training

2 Days.

Suggested sizing

15-30 participants.

Price

€995,- (excl. VAT) per participant.

Early bird discount of €100,- per participant, when booking is done at least one month in advance.

Target audience

- Individuals new to Agile who are preparing to use Agile for the first time.
- Agile Team Members (Developers, Testers, Analysts, etc.).
- Scrum masters.
- Product Owners Leaders.
- Managers of those on Agile Teams.
- Primary Stakeholders of Agile Teams (Designers, Architects, Project Managers, etc.).

Course outline

In this training, the following topics are covered:

- Traditional development approaches vs. agile.
- Agile principles.
- Themes: incremental, iterative, collaboration, transparency.
- Agile frameworks and processes and scrum.
- Scrum roles: product owner, scrum master, development team, scrum team.
- Scrum process: agile delivery cycle and scrum ceremonies.
- Tracking progress & forecasting.
- The vision: purpose of vision, overview of simulation vision, elevator pitch.
- User stories, the three C's, personas.
- Definition of done.
- Estimation: traditional vs. relative estimation, story points, planning poker, affinity estimation.

At the end of the training we will simulate the delivery of 2 sprints and experience the scrum framework and roles into practice.

What participants say about our Agile Foundations training:

'Interactive way of doing the training is really interesting, understandable and also fun!'

'Good combination between theory, practical and experience from the trainers to learn from.'

Learning objectives

By the end of the course successful learners will be able to:

- Discuss Agile values and principles as they relate to their role, team and organization.
- Describe that Agile is more than a collection of processes.
- List popular Agile processes and frameworks.
- Give examples of Agile roles, how they interact, and what it takes to create a strong team dynamic.
- Summarize the Scrum framework and collection of ceremonies.
- Explain why shared understanding of Product Vision is key for success.
- Develop user stories that describe “requirements” in context of the user’s needs.
- Apply more than one method for estimating user stories.
- Articulate the purpose of “done” and create a Definition of Done.
- Track and forecast the progress of an Agile team using multiple methods
- Employ techniques focused on continuous improvement.
